INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant NESTEC S.A et al. 1. This report is the international preliminary examination of the profits of the description, claims and/or drawings which have been amended and are the basis of this report and to the applicant profits in the international application of 70 ft be supported by the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 5 sheets, including this cover sheet. 3. This report is also accompanied by ANNEXES, comprising: a. Sent to the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority considers contain an amendment that goes beyond the disclosure in the international Bureau analy is a total of 5 sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filled, as indicated in item 4 of Box No. I and the Supplemental Box. b. Supplemental Box. b. Supplemental Box. containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. This report contains indications relating to the following items: Box No. II Basis of the opinion Box No. IV Lack of unity of invention Box No. VII Certain documents cited Box No. VII Certain defects in the international application Date of submission of the demand Date of submission of the		T						
International Patent Classification (IPC) or national classification and IPC A47J31/A0, B65D85/804 Applicant NESTEC S.A et al. 1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 5 sheets, including this cover sheet. 3. This report is also accompanied by ANNEXES, comprising: a. sent to the applicant and to the International Bureau) a total of sheets, as follows: and/or sheets containing reclifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filled, as indicated in item 4 of Box No. I and the Supplemental Box. b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) , containing a sequence listing arrior tables related therato, in computer readable form only, as indicated in the Supplemental Box. A This report contains indications relating to the following items: Box No. II Box No. IV Lack of unity of invention Box No. IV Lack of unity of invention Box No. VI Cartain defects in the international application Box No. VI Certain documents cited Box No. VI Certain defects in the international application Box No. VI Certain observations on the international application Box No. VII Certain observations on the international application Box No. VII Certain observations on the international application Box No. VII Certain observations on the international application Box No. VII Certain observations on the international application Box No. VII Certain observations on the international application Box No. VII Certain observations on the international preliminary examining authority:	-	FOR FURTHER AC	TION :	See Form PCT/IPEA/416				
Applicant NESTEC S.A et al. 1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 5 sheets, including this cover sheet. 3. This report is also accompanied by ANNEXES, comprising: a. sent to the applicant and to the International Bureau) a total of sheets, as follows: sheets of the description, claims and/br drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. 1 and the Supplemental Box. b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) , containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. This report contains indications relating to the following items: Box No. II Priority	• •		ay/month/year)	1 ' ' ' ' ' '				
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 5 sheets, including this cover sheet. 3. This report is also accompanied by ANNEXES, comprising: a sent to the applicant and to the International Bureau) a total of sheets, as follows: sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. 1 and the Supplemental Box. b (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)), containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. 10/565580

IAP20 Rec'd FCTATO 23 JAN 2006

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET) International application No.

PCT/EP2004/006674

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document:

D1: US 2002/129712 A1

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

A system according to claim 1 is implicitly disclosed by D1.

This document discloses a system according to the preamble of claim 1. Further, said system can use capsules intended for forming different beverages. In paragraph 70, D1 states that the geometry of the extraction chamber of the capsule can be chosen so as to aid in the formation of foam. This implies that, depending on the extraction chamber of the capsule, a beverage with or without foam can be obtained. Furthermore, also in the same paragraph, D1 states that the characteristics of the foam can be chosen. The skilled reader will understand therefrom that several different capsules can be provided, with several foaming characteristics.

In paragraph 70, the reader is taught that the foam can be obtained thanks to mechanical impingement of the beverage extract; in paragraph 74, that it can be obtained through a given orifice size of the extraction exit site. In both cases, as a consequence of these arrangements, the extraction pressure is impacted.

For these reasons, the system of D1 has also the technical features of the characterising part of claim 1.

- 3. The capsules disclosed in D1 have furthermore all the additional features noted in dependent claims 2 to 5, 8, and 10 to 12. The subject-matter of said claims is therefore not new either.
- 4. For the reasons exposed in paragraph 2 above, the method of claim 15 is not new.

- 5. The additional features of claims 13 and 14 do not involve an inventive step, since they appear to result from a mere choice by the skilled person.
- 6. The combination of the features of dependent claim 6 is neither known from, nor rendered obvious by, the available prior art, because said prior art does not suggest to monitor the extraction pressure by adapting the resistance of the capsule, in any of the ways listed in claim 6.
- 7. Claim 7 depends on claim 6, and as such meets also the requirements of the PCT with respect to novelty and inventive step.
- 8. The combination of the features of dependent claim 9 is neither known from, nor rendered obvious by, the available prior art, because said prior art does not suggest to monitor the extraction pressure by adapting the piercing protrusions of the capsules.

Re Item VII

Certain defects in the international application

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D1 is not mentioned in the description, nor is this document identified therein.
